Did you know?

- Care must be taken when ordering or installing carpeting. Like all textile products, it is subject to shade variation between batches.
- Due to dye lot variations, actual material may vary from samples.Certain light sources shining across the surface may emphasise the effect of shadow lines.These are not a manufacturing defect and will not detract from the performance of the carpet.
- Adequate precautions must be taken to protect the carpet against direct sunlight to prevent premature fading or damage.
- Regular vacuum cleaning is essential. Spills and surface stains can be removed by sponging with a damp cloth, or for more resistant stains, with a mild detergent solution.
- A well maintained carpet can reduce airborne allergens, contributing to healthier indoor air quality.Unlike other surfaces, carpet traps dust particles, which keeps them out of the air, and allows them to be easily vacuumed up.
